

**Figure S2.** Clusters of cell-wall associated GPI-proteins. Families of yeast and mould GPI-anchored proteins are: common to both *A. fumigatus* and *S. cerevisiae* (*GEL*, *CRH*, *DFG*, *SPS2*, *BGL2*); unique to *S. cerevisiae* (*FLO*, *TIP*, *TIR*, *SED*, *CWP*, *AGA*, *FIG*); unique to *A. fumigatus* (hydrophobins (*rod*),  $\alpha$  1,3 glucanase, chitinase, chitosanase, chitin deacetylase). See also Table S7.
